

# femcare

sanitary unit

**The Femcare Sanitary Disposal Unit provides a discrete and trusted solution for the washroom and is available in touch-free or manual options to suit any budget.**

Easy clean ABS plastic construction.

Slim profile for universal cubicle access and placement.

Fragranced, degradable Multiliner and degradable cartridge system.

In conjunction with the double lined system, we use P-Max, a natural, non-toxic antimicrobial sachet placed in the interior liner that helps to eliminate odour and bacteria through an advanced vapour action.

Antimicrobial agents are added to the moulding during manufacture which inhibits the growth of a broad spectrum of germs and reduces surface bacteria by up to 99.9%.

Long-lasting, standard C-cell batteries - easy use and low maintenance requirements.

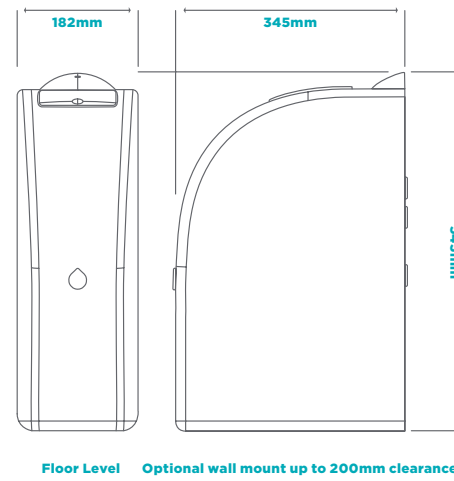

Easy to remove and replace sensor drive module electronics for service and cleaning.

Femcare treatment products are totally safe and biodegradable, providing the highest levels of efficacy both in terms of bacteria & virus kill and odour control.

Femcare Bins can be wall mountable or free standing and come with an optional sanitary bag dispenser.

#### **Pair with:**

Sanitary bag dispenser, p-max

**Hands Free Hygiene**
